COMBUSTION AND FLAME

THE JOURNAL OF THE COMBUSTION INSTITUTE

VOLUME 85 1991

Contents

TOMOJI ISHIGURO, NORITOMO SUZUKI, YOSHIYASU FUJITANI, and HIDETAKE MORIMOTO (Nagakute-cho, Japan)
Microstructural Changes of Diesel Soot During Oxidation 1
R.K. CHENG and I.G. SHEPHERD (Berkeley, CA)
The Influence of Burner Geometry on Premixed Turbulent Flame Propagation 7
STEVEN ZABARNICK (Edwards AFB, CA)
Laser-Induced Fluorescence Diagnostics and Chemical Kinetic Modeling of a $CH_4/NO_2/O_2$ Flame at 55 Torr 27
S.F. SON (Provo, UT), P.A. MCMURTRY (Salt Lake City, UT), and M. QUEIROZ (Provo, UT)
The Effect of Heat Release on Various Statistical Properties of a Reacting Sheer Layer 51
TAKEO SAITO, MASATAKA SHIMODA, TOSHIO YAMAYA, and AKIRA IWAMA (Sagamihara City, Japan)
Ignition of AP-Based Composite Solid Propellants Containing Nitramines Exposed to CO_2 Laser Radiation at Subatmospheric Pressures 68
A. LEE and C.K. LAW (Princeton, NJ)
Gasification and Shell Characteristics in Slurry Droplet Burning 77
PIA KILPINEN and MIKKO HUPA (Turku, Finland)
Homogeneous N_2O Chemistry at Fluidized Bed Combustion Conditions: A Kinetic Modeling Study 94
DEREK BRADLEY, G. DIXON-LEWIS, S. EL-DIN HABIK, S. EL-SHERIF (Leeds, England), and L.K. KWA (Singapore)
Laminar Flame Structure and Burning Velocities of Premixed Methanol-Air 105
M.P. BONIN and M. QUEIROZ (Provo, UT)
Local Particle Velocity, Size, and Concentration Measurements in an Industrial-Scale Pulverized Coal-Fired Boiler 121
SHYAN-LUNG CHUNG, MING-SHYONG TSAI, and HUOO-DENG LIN (Tainan, Taiwan)
Formation of Particles in H_2-O_2 Counterflow Diffusion Flame Doped with SiH_4 or $SiCl_4$ 134
D.K. COOK (Solihull, England)
A One-Dimensional Integral Model of Turbulent Jet Diffusion 143
A.N. HAYHURST (Cambridge, England)
Does Carbon Monoxide Burn Inside a Fluidized Bed? A New Model for the Combustion of Coal Char Particles in Fluidized Beds 155
V.B. APTE, R.W. BILGER (Sydney, Australia), A.R. GREEN (Londonderry, Australia), and J.G. QUINTIERE (Gaithersburg, MD)
Wind-Aided Turbulent Flame Spread and Burning Over Large-Scale Horizontal PMMA Surfaces 169
J.W. DOLD (Bristol, UK) and A.K. KAPILA (Troy, NY)
Comparison Between Shock Initiations of Detonation Using Thermally-Sensitive and Chain-Branching Chemical Models 185
S. SIVASEGARAM and J.H. WHITELAW (London, England)
The Influence of Swirl on Oscillations in Ducted Premixed Flames 195
N. PETERS and J. GÖTTGENS (Aachen, Germany)
Scaling of Buoyant Turbulent Jet Diffusion Flames 206
M.S. MANSOUR, R.W. BILGER (Sydney, Australia), and R.W. DIBBLE (Livermore, CA)
Turbulent Partially Premixed Flames of Nitrogen-Diluted Methane Near Extinction 215

JOHAN E. HUSTAD, DAG VAREIDE, and OTTO K. SØNJU (Trondheim, Norway)
Burning Rates of Coke Particles in the Freeboard Above a Fluidized Bed Reactor 232
B. VEYSSIERE (Poitiers, France) and B.A. KHASAINOV (Moscow, USSR)
A Model for Steady, Plane, Double-Front Detonations (DFD) in Gaseous Explosive Mixtures with Aluminum Particles in Suspension 241
BRAD E. FORCH and ANDRZEJ W. MIZIOLEK (Aberdeen Proving Ground, MD)
Laser-Based Ignition of H_2/O_2 and D_2 O_2 Premixed Gases Through Resonant Multiphoton Excitation of H and D Atoms Near 243 nm 254
R. MINETTI, C. CORRE, J. -F. PAUWELS, P. DEVOLDER, and L.-R. SOCHET (Villeneuve D'Ascq, France)
On the Reactivity of Hydroperoxy Radicals and Hydrogen Peroxide in a Two-Stage Butane–Air Flame 263

Brief Communications

D.L. BAULCH, J.F. GRIFFITHS, and R. RICHTER (Leeds, England)
Free Radical and Atom Activity at a Pyrex Glass Surface as a Source of Sodium D Line Emissions During Combustion Reactions 271
J.G. KANG, S.W. LEE, S.S. YUN, S.N. CHOI, and C.S. KIM (Daejeon, Korea)
Ignition Delay Times of Nitromethane–Oxygen–Argon Mixtures Behind Reflected Shock 275
P.A. TESNER (Moscow, USSR)
Growth Rate of Soot Particles 279
R.A. SHANDROSS, J.P. LONGWELL, and J.B. HOWARD (Cambridge, MA)
Noncatalytic Thermocouple Coating for Low-Pressure Flames 282

G. STAHL and J. WARNATZ (Stuttgart, Germany)
Numerical Investigation of Time-Dependent Properties and Extinction of Strained Methane–and Propane–Air Flamelets 285
M. M. ELKOTB, S. L. ALY, and H. A. ELSALMAWY (Cairo, Egypt)
Evaporation Characteristics of Fuel and Multifuel Droplets 300
P. E. BEST, P. L. CHIEN, R. M. CARANGELO, P. R. SOLOMON, M. DANCHAK, and I. ILOVICI (Hartford, CT)
Tomographic Reconstruction of FT–IR Emission and Transmission Spectra in a Sooting Laminar Diffusion Flame: Species Concentrations and Temperatures 309
RENATO ROTA, PAOLO CANU, SERGIO CARRA (Milano, Italy), and MASSIMO MORBIDELLI (Cagliari, Italy)
Vented Gas Deflagration Modeling: A Simplified Approach 319
STEPHEN C. BATES (Warren, MI)
Further Insights Into SI Four-Stroke Combustion Using Flame Imaging 331
T. A. SEDER and D. J. BENARD (Thousand Oaks, CA)
The Decomposition of Condensed Phase Fluorine Azide 353
H. PHYLAKTOU and G. E. ANDREWS (Leeds, UK)
The Acceleration of Flame Propagation in a Tube by an Obstacle 363
TRAN X. PHUOC and MAHENDRA P. MATHUR (Pittsburgh, PA)
Transient Heating of Coal Particles Undergoing Pyrolysis 380
CAMERON J. DASCH and DAVID M. HEFFELFINGER (Warren, MI)
Planar Imaging of Soot Formation in Turbulent Ethylene Diffusion Flames: Fluctuations and Integral Scales 389
M. O. ANNARUMMA, J. M. MOST, and P. JOULAIN (Mignaloux-Beauvoir, France)
On the Numerical Modeling of Buoyancy-Dominated Turbulent Vertical Diffusion Flames 403
J. SHARMA, G. B. WILMOT, A. A. CAMPOLATTARO, and F. SANTIAGO (Silver Spring, MD)
XPS Study of Condensed Phase Combustion in Double-Base Rocket Propellant With and Without Lead Salt–Burning Rate Modifier 416

C. A. CATLIN (Solihull, UK) and R. P. LINDSTEDT (London, UK)
Premixed Turbulent Burning Velocities Derived from Mixing Controlled Reaction Models With Cold Front Quenching 427
GARY P. MILLER, T. W. LESTER, and M. T. CHENG (Baton Rouge, LA)
Nitric Oxide Reduction in the Postflame Region of Pulverized Coal Flames 440
R. P. HESKETH and J. F. DAVIDSON (Cambridge, UK)
Combustion of Methane and Propane in an Incipiently Fluidized Bed 449
CHI-CHANG LIU and TA-HUI LIN (Tainan, Taiwan)
The Interaction Between External and Internal Heat Losses on the Flame Extinction of Dilute Sprays ... 468
J. K. CHEN and T. B. BRILL (Newark, DE)
Thermal Decomposition of Energetic Materials 50. Kinetics and Mechanism of Nitrate Ester Polymers at High Heating Rates by SMATCH/FTIR Spectroscopy 479
MARY P. DUNPHY and JOHN M. SIMMIE (Galway, Ireland)
Combustion of Methyl *tert*–Butyl Ether.
Part I: Ignition in Shock Waves 498
E. HAMPARTSOUMIAN, W. NIMMO, A. G. CLARKE, and A. WILLIAMS (Leeds, UK)
The Formation of NH_3, HCN, and N_2O in an Air-Staged Fuel Oil Flame 499
C. TREVIÑO (México City, Mexico), S. DONNERHACK (München, Germany), and N. PETERS (Aachen, Germany)
LDA Measurements in the Premixed V Flame Stabilized in the Wake of a Flat Plate Boundary Layer ... 505
K. A. SAHETCHIAN, R. RIGNY, and S. CIRGAN (Paris, France)
Identification of the Hydroperoxide Formed by Isomerization Reactions During the Oxidation of *n*–Heptane in a Reactor and CFR Engine 511
T. TACHIBANA, K. HIRATA, H. NISHIDA, and H. OSADA (Kitakyushu, Japan)
Effect of Ozone on Combustion of Compression Ignition Engines 515

Brief Communications

J. AMROGOWICZ and W. KORDYLEWSKI (Wroclaw, Poland)
Effectiveness of Dust Explosion Suppression by Carbonates and Phosphates 520
I. T. WOODS (London, UK) and B. S. HAYNES (Sydney, Australia)
Soot Surface Growth at Active Sites 523
